

# maintenanceStatus

---

**Scope Note:** To identify the current drafting status of the EAS instance (i.e., the status of the record, itself). Resource used for values and scope notes:

- EAC-CPF 2.0 Tag Library, <https://eac.staatsbibliothek-berlin.de/schema/v2/eac.html#attr-maintenanceStatus>

@maintenanceStatus is an attribute used in <control>. Accepted values for @maintenanceStatus are listed below with scope notes.

---

## cancelled

**Scope Note:** Record that is not current (obsolete or rejected) but kept for reference.

## deleted

**Scope Note:** Record that has been deleted from the system.

## deletedMerged

**Scope Note:** Record is deleted because it has been merged with another record.

## deletedReplaced

**Scope Note:** Replaced by a new record.

## deletedSplit

**Scope Note:** Deleted because it has become superseded by two or more records then its status.

## derived

**Scope Note:** Indicates that the record was derived from another descriptive system.

## new

**Scope Note:** Initial creation of an EAS record.

## revised

**Scope Note:** Record that has been revised after initial creation.
