

Relation to a Resource

Schema: EAC-CPF 2.0

Context: Describe the relationship between the entity described and a resource, like archival records, fonds, papers, publications, images/photos etc.

Description: Use the wrapper element `<relation>` to include all information about the related resource and the character of the relation. Use the required child element `<targetEntity>` to provide a title or name of the related resource. Use the optional child element `<relationType>` to specify the type of relation. Use the optional child element `<targetRole>` to specify the role of the related entity. Use `<date>`, `<dateRange>`, or `<dateSet>` for specifying the time period of the relationship and `<place>` for relevant location information. `<descriptiveNote>` may be included for more detailed specifications or explanations of the relationship.

If needed, use `<objectXMLWrap>` to embed XML documenting the related entity from any (or no) namespace.

Examples

```
<relation>
  <targetEntity targetType="resource">
    <part>Mémorial du colonel Gustafsson. – 1829</part>
  </targetEntity>
  <date>1829</date>
  <relationType
    valueURI="https://www.ica.org/standards/RiC/ontology#isCreatorOf"
    vocabularySource="RiC-0"
    vocabularySourceURI="https://www.ica.org/standards/RiC/ontology">is
    creator of</relationType>
  <targetRole>Publication</targetRole>
</relation>
```
